Key Skills

- Javascript
- Typescript
 - Angular
 - AngularJS
- Redux (NgRx)
 - PWA
- Bootstrap
- Angular Material
- TailWind CSS
 - CSS3
 - Sass
- HTML5
- Java
- RxJS
- NodeJS
- PostgreSQL
- Oracle DB
- MongoDB
 - Git
- Jasmine
- Protractor
- Google Cloud Platform
 - AWS
- Jenkins
- TeamCity

Summary

Senior Software Engineer with 9+ years of professional experience specializing in Angular frontend development (v2+ through v18) and architectural modernization. Proven expertise in leading complex refactoring and migration initiatives across large-scale, enterprise-level platforms, resulting in improved stability and reduced technical debt. Adept at designing hybrid application architectures (Angular/Legacy Codebase), mentoring development teams, and enforcing best practices in Clean Code, SOLID principles, and Accessibility (WCAG) within demanding Agile environments.

Career History

Senior Software Engineer at Invite — Remote, Bogotá, Colombia.

August 2024 - Present

- Led the technical execution for a core team of 8 Angular developers (acting as the primary focal point for the client).
- Drove a major code refactoring and modernization initiative to decouple the platform from large third-party dependencies (jQuery, PrototypeJS).
- Implemented a stable hybrid application model where newly refactored Angular 18 components are successfully downgraded to seamlessly coexist with the existing legacy codebase (PHP/AngularJS).
- Developed and maintained multiple in-house Angular libraries to standardize business logic and reusable components across all e-learning products.
- Conducted technical interviews for new candidates and led the onboarding process to quickly integrate new developers into the project's complex hybrid environment.
- Collaborated with the UX team to ensure all refactored e-learning solutions met accessibility standards (WCAG), a critical requirement for educational software.
- Conducted bug fixes and code reviews.
- Performed unit tests using Karma-Jasmine.

Industries: *E-Learning*

Technologies: Javascript, Typescript, *AngularJS*, *Angular 18*, *PHP*, *Angular Material*, *HTML*, *CSS*, *Sass*, *Git*, *Jasmine*, *MySQL*, *GCP*, *GitLab*

Education

Electronic Engineer

Escuela Colombiana de Ingeniería
"Julio Garavito" Colombia - 2010

Additional Education

- ✓ Ultimate AWS Certified Developer Associate – 33hs – Udemmy online - in progress
- ✓ Javascript Advanced– 12hs – Udemmy online - in progress
- ✓ PWA – 15hs – Udemmy online - 2024
- ✓ Solid principles and clean code - 6.5hs - Udemmy online - 2024
- ✓ Redux in Angular with NGRX - 12.5hs - Udemmy online - 2022
- ✓ Advanced Angular – 27hs - Udemmy online – 2019
- ✓ Angular – 28hs – Udemmy online – 2018
- ✓ SCRUM Fundamentals Certified SFC – 6 hs – SCRUMStudy – 2016
- ✓ Cloud-based Application Development with Bluemix – 4hs – Intranet IBM – 2016
- ✓ AngularJS – 10hs – Intranet IBM – 2016
- ✓ Agile Program Fundamentals – 4hs – Intranet IBM – 2015
- ✓ DevOps Foundation – 4hs – Intranet IBM – 2015

Front-end Software Engineer at Perficient – Remote, Bogotá, Colombia.

July 2021 - October 2023

- Created some web applications to replace the client's legacy web applications following Clean Code practices and SOLID principles.
- Created new features and functionalities in the client's web application using Angular 12-15, and Angular Material.
- Created a couple of Angular libraries to be installed and used in other Angular web applications.
- Recommended solutions for a streamlined, user-friendly interface.
- Performed bug fixes and code reviews.
- Performed unit tests using Karma-Jasmine.
- Performed automated tests using protractor.
- Worked with agile-scrum teams.
- Worked on 4 different applications for the same client during this time.

Industries: *Transportation*

Technologies: *Javascript, Typescript, Angular 12-15, Redux, Angular Material, HTML, CSS, Sass, Git, Jasmine, Protractor, Oracle DB, GCP, TeamCity, Bitbucket*

Web UI developer at Globant – Hybrid, Bogotá, Colombia.

July 2019 - June 2021

- Got a promotion from SSR Adv to SR.
- Designed and proposed a solution to decouple a monolithic application into an application based on micro-frontend to facilitate development and maintenance.
- Created new features and functionalities in the client's web application using Angular 9, Bootstrap, and Spring Java following Clean Code practices and SOLID principles.
- Recommended solutions for a streamlined, user-friendly.
- Performed bug fixes and code reviews.
- Performed unit tests using Jasmine.
- Performed automated tests using protractor.
- Worked with agile-scrum teams.
- Worked on 2 different projects/clients during this time.

Industries: *Marketing, Insurance*

Technologies: *Javascript, Typescript, Angular 9, Bootstrap, HTML, CSS, Sass, Git, Jasmine, Protractor, Oracle DB, Jenkins*

Hobbies

- ✓ Mountain biking
- ✓ Trekking
- ✓ Video Games

App Developer at IBM – On-site, Bogotá, Colombia.

January 2016 - June 2019

- Created web applications on WebLogic Server using the TypeScript framework Angular 2+, 5+ and web design Bootstrap 3, 4.
- Implemented a web application on NodeJS in PaaS IBM Bluemix using AngularJS and Angular Material, integrating IBM Bluemix services.
- Implemented REST services in Spring Framework (Java).
- Coached junior web developers on the team.
- Worked on an agile-scrum methodology.
- Git version and SVN control tool.
- Performed bug fixes and code reviews.
- Performed unit tests using Jasmine.
- Worked on 3 different projects/clients during this time.

Industries: *Banking*

Technologies: Javascript, Typescript, AngularJS, *Angular 2 - 5, Bootstrap, HTML, CSS, Git, Jasmine, Oracle DB.*

Test Specialist at IBM – Bogotá, Colombia.

August 2010 - December 2015

- Led functional testing team.
- Implemented the software testing process for the client.
- Planned, executed, and closed software testing projects: Feasibility analysis, sizing, and test estimation according to requirements.
- Prepared tests and designed and generated flows of test cases.
- Managed bugs found in tested applications.
- Supported preparation of test environment, preparation of data, and configuration of tools.
- Executed functional and regression tests.
- Performed an analysis and simulations of the software used to accomplish the Electoral Processes in Colombia.
